Quick Tips for Navigating Electronic Resources from http://lib.uconn.edu/

Q: Which database should I use to find articles?
A: It depends on your subject of interest and the depth of information desired.
- More easily understood interdisciplinary articles may be found in Academic Search Premier & in Newspapers through ProQuest. Find a database by name at this link: http://rdl.lib.uconn.edu/byTitle.php.
- Professional level articles are available from subject databases. For a list of recommended databases by subject, visit the Databases tab on the UConn Libraries homepage, (or go to this link: http://rdl.lib.uconn.edu/bySubject.php). An interdisciplinary professional level database called Scopus is also useful for many topics.

Q: How do I access databases from off-campus?
A: When you click on a database link, you'll be prompted for your NetID and password. Once logged in, you shouldn't have to re-login to move in and out of other resources.

Q: What is my NetID and password?
A: You can find and activate your NetID and password by visiting the NetID webpage: https://netid.uconn.edu/NetIDHome/. If you encounter problems, you can contact University Information Technology Services at helpcenter@uconn.edu, or 860-486-4357.

Q: How do I get the full-text of an article?
A: Look for the UConn Links icon.

Scopus

ProQuest platform (ex. ProQuest Historical Newspapers, Worldwide Political Science Abstracts)

EBSCO platform (ex. Academic Search Premier, MLA international Bibliography, America; History & Life, PsycINFO)
