

# WHAT ARE WE WORKING ON?

Hello CES families! All K-2 students have been working on learning the basics of coding! Your students have been using programs such as Kodable, Code-a-pillar, Scratch Jr. and more! Our second graders are currently finishing a project using Scratch Jr. to create a short video using coding to teach other kids about rules in our community. Now your students will begin research skills. We are so proud how far they have all come!

Want to check out what all of our students have been working on?
